# Background

When exporting files from the Anytone CPS for AT-D878UV the Optional settings are not saved as a Comma Separated File.

In this document you'll find my settings.

Images

I have a custom power-on image.

No comments.
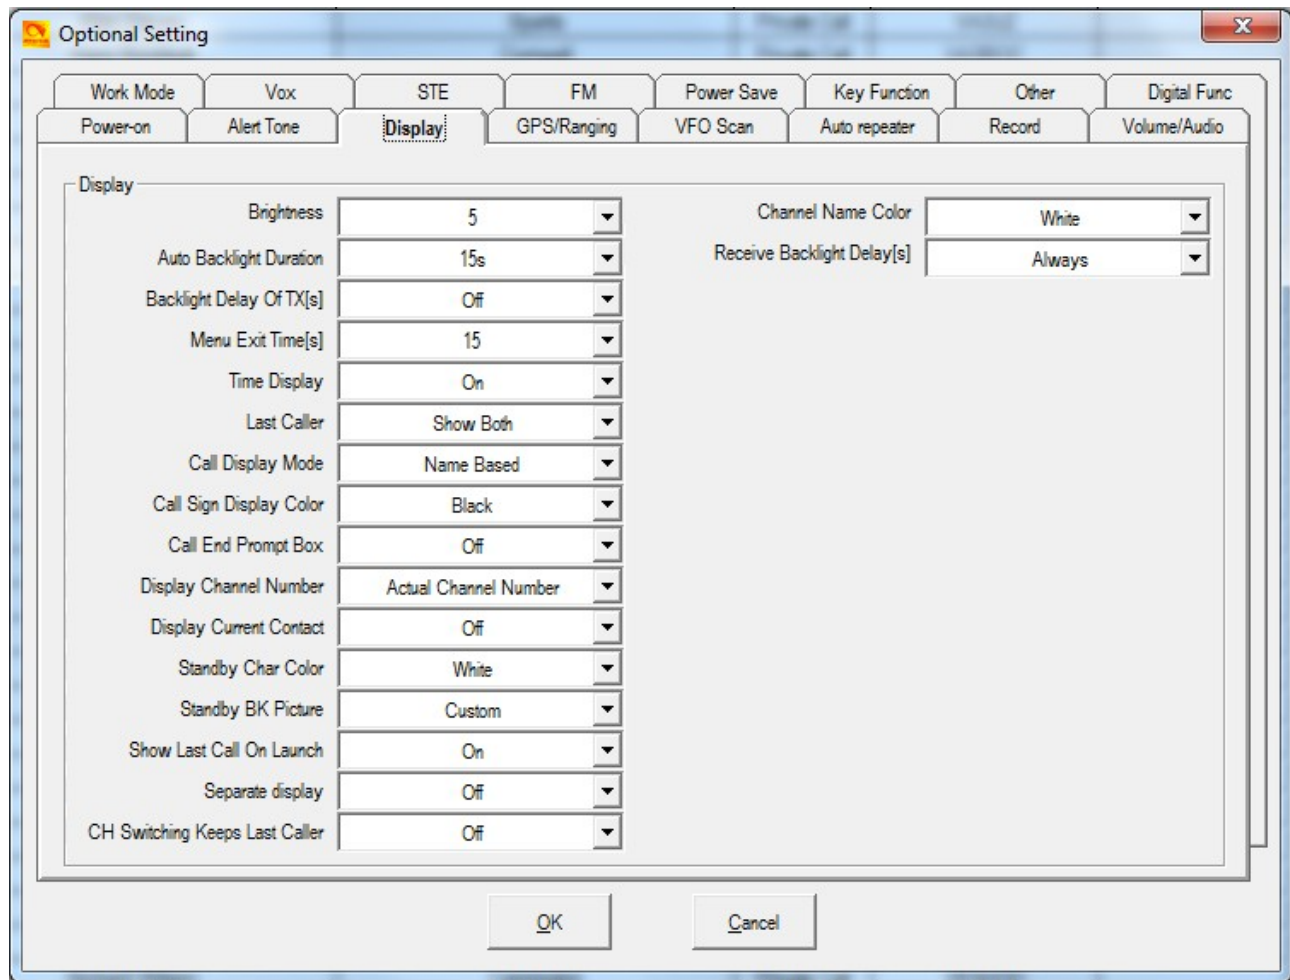

My settings for Talker Alias among other things.
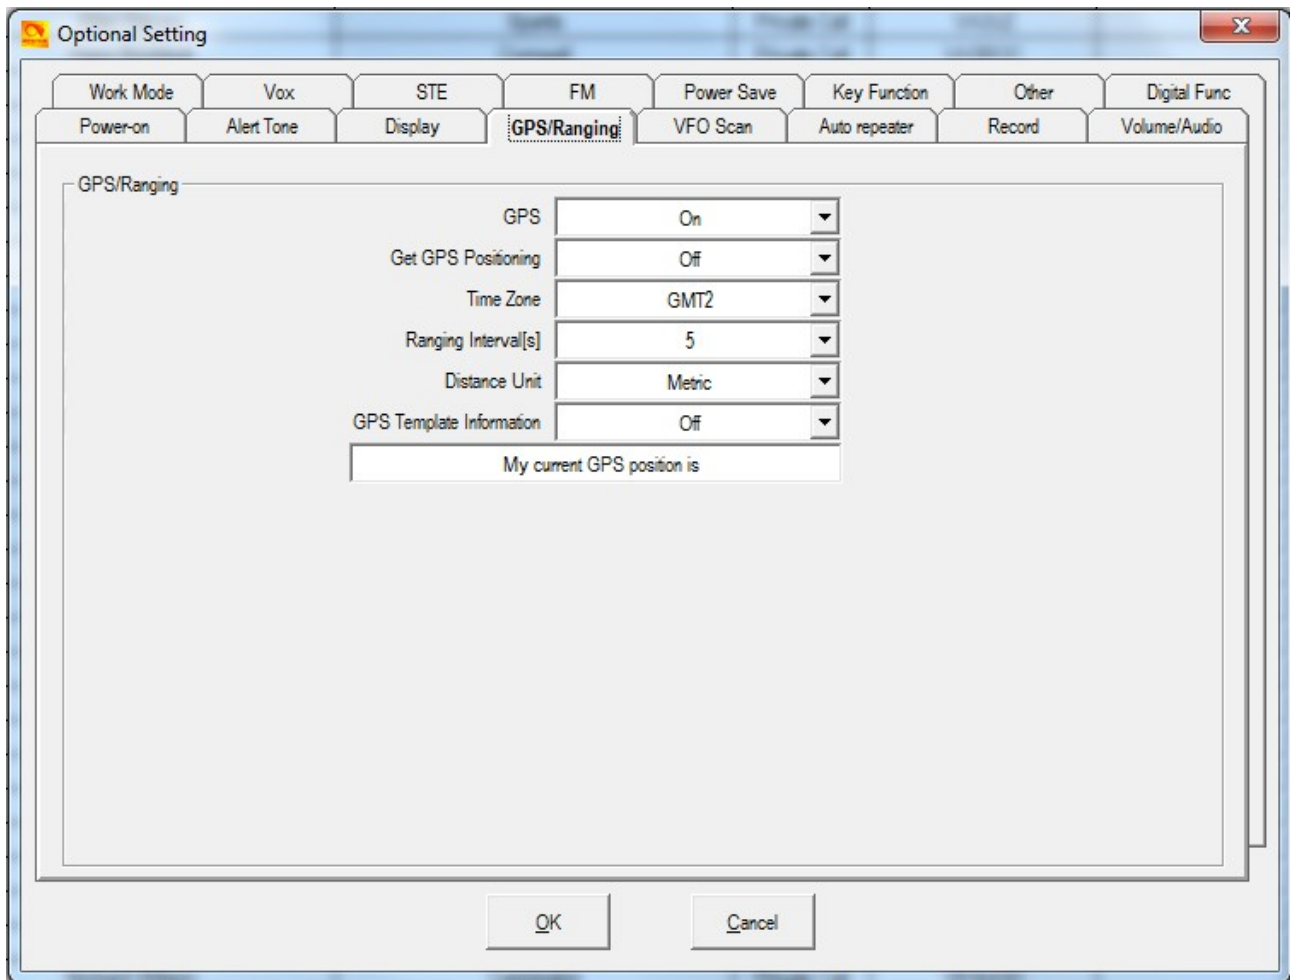

The GPS is started by default.

No comments.

Roaming is started in Roaming SM0 roaming zone by default.
- In case you don't want roaming to be started automatically, set Auto Roaming to OFF.
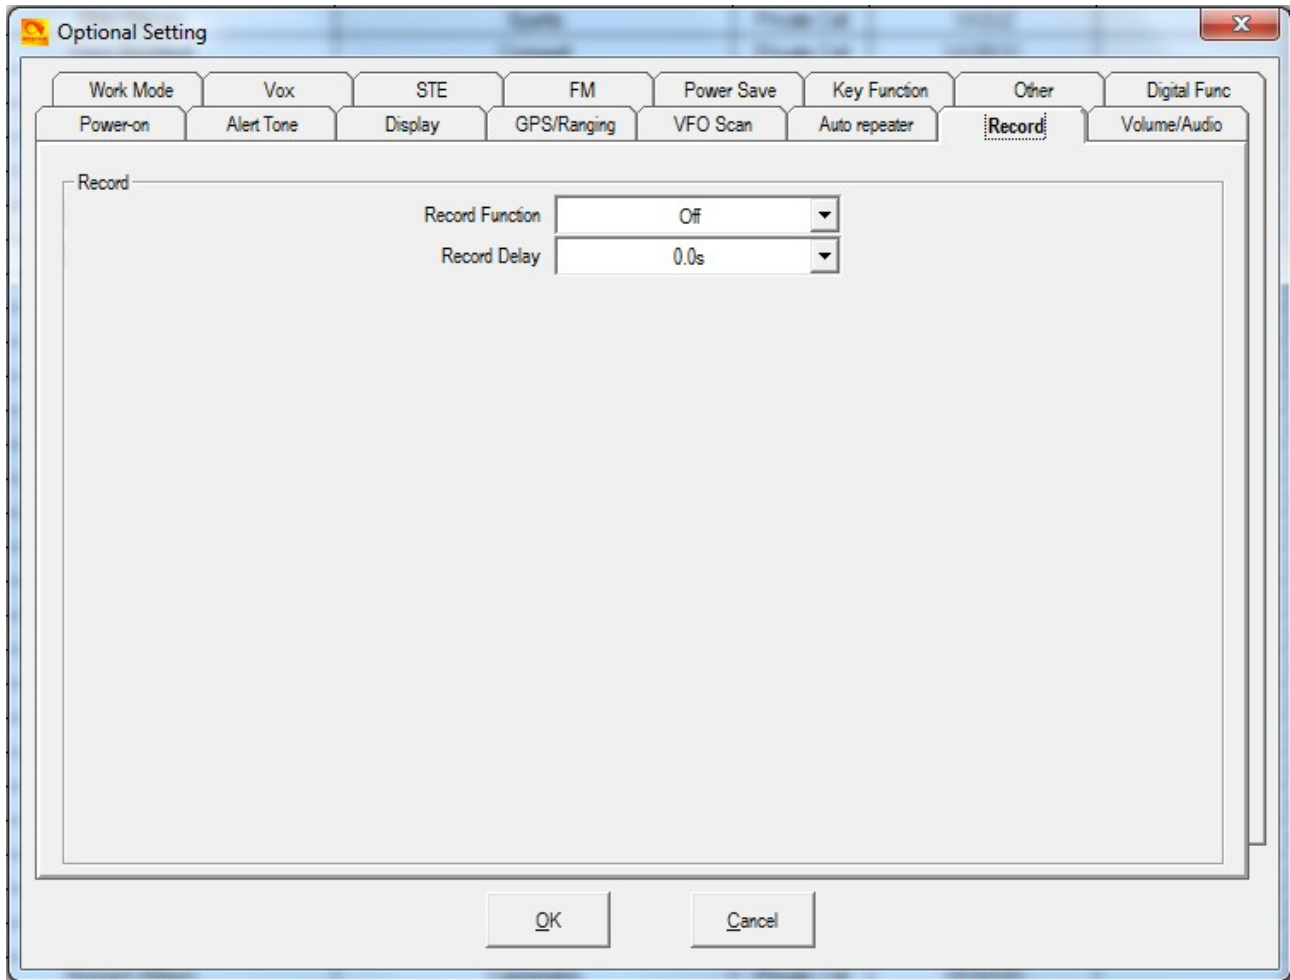

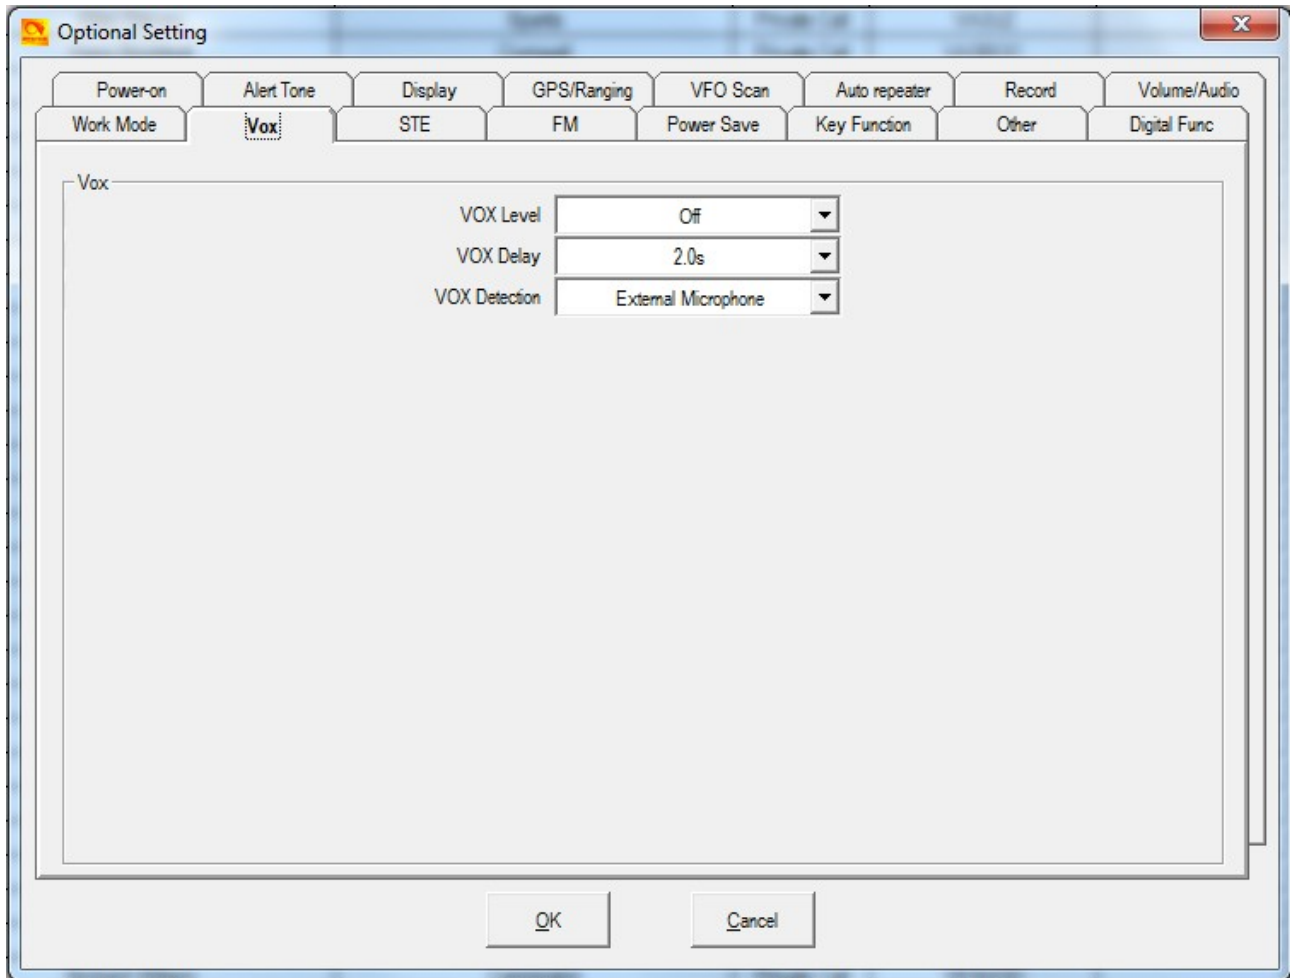

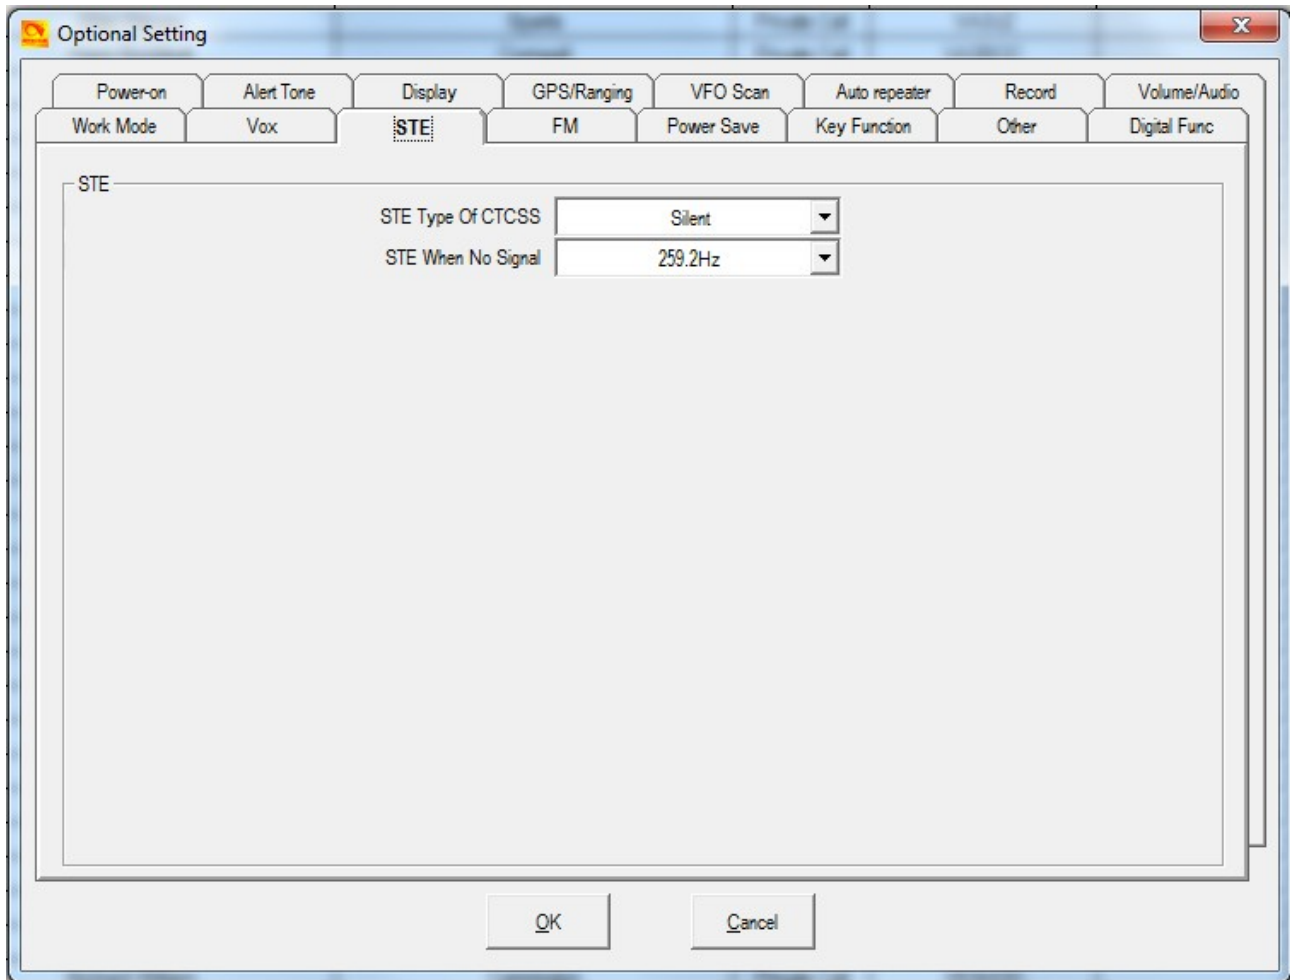

No comments.
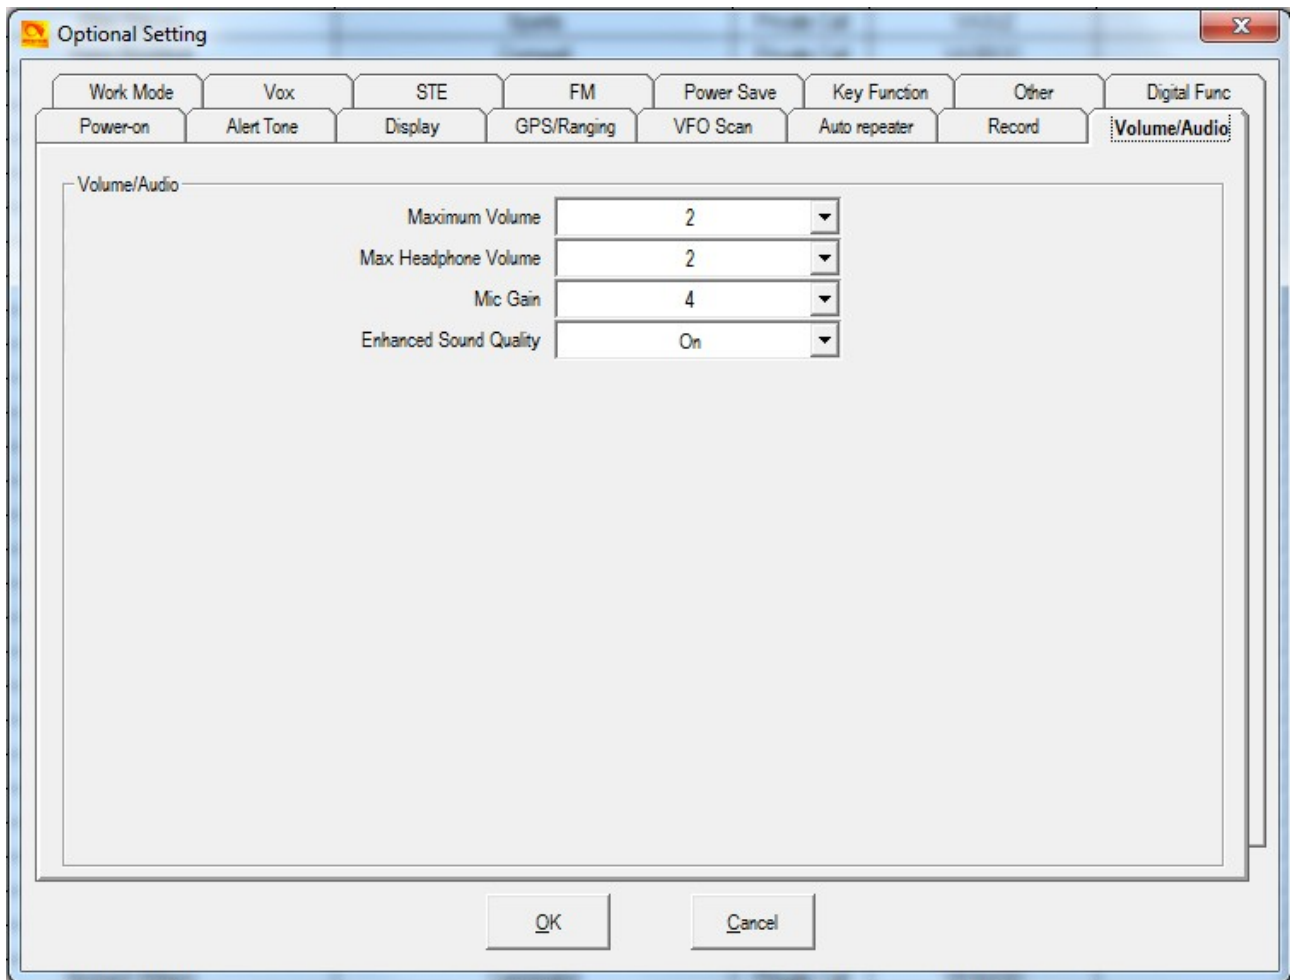

The default volume is way to high according me. The Mic Gain is way to low.

I use Power Save 2:1.

My PF1/PF2/PF3/P1/P2, both short and long, settings.

No comments.

Group Call Hold Time and Person Call Hold Time is way to short. When setting both values to 15 seconds I have time to grab my radio and answer to the correct Talk Group or Private Call. Makes Private Call working very charmful.
